How to make cobweb latte art

1. Make your hot drink as usual. If making a latte, let the milk form a white circle in the centre.

2. Use Zuma Dark Chocolate or Caramel Sauce to make 3 consecutive circles on the top of your drink and a dot in the centre.

3. Use an object with a thin point (the end of a stirrer, knife or thermometer work well) and draw a line outwards from the centre of the milk.

4. Wipe the tip of the tool, and then repeat again as above to end up with 8 lines. Make sure you remember to wipe clean after each line to keep it neat.
