## THE GOOD SCOOP GUIDE

All powdered Zuma products have been developed to use with accurate portion scoops for good measures. This means customers are guaranteed the same taste every time they order, staff consistently and easily make the drinks, and most importantly, the cost to your business for each serve can be calculated and maintained. There are three scoops, all with their size embossed on the base for easy identification. All recipes are 12oz drinks unless stated otherwise. Make guides, with the scoop and serving size, are also on each pack.
